PROFESSIONAL EXPERIENCE

Cargill | Costa Rica

Senior Software Engineer / Team Lead | Nov 2020 - Present | Team Lead since Dec 2025

- Serve as one of the team leads, providing technical guidance, architectural direction, code reviews, and mentoring.
- Design, develop, and support backend services, integrations, and APIs using Java, Spring Boot, Python, and FastAPI.
- Coordinate the migration of enterprise data capabilities from legacy Hadoop/HDFS to AWS, integrating JDBC databases, Kafka, APIs, and files.
- Build web application components with React, TypeScript, Vite, Redux Toolkit, and Ant Design.
- Partner with business stakeholders, product, and data teams to translate complex requirements into scalable technical solutions.
- Implement CI/CD and deployment automation with GitHub Actions, Docker, Kubernetes, and infrastructure as code.
- Troubleshoot complex application, integration, and production issues, driving root-cause analysis and sustainable fixes.
- Drive continuous improvement in engineering standards, software quality, automated testing, documentation, and reliability.

Cargill - Application Development Analyst | Dec 2017 - Oct 2020 | Costa Rica

- Delivered application and integration solutions for global operations, working directly with business partners and IT teams.
- Designed, developed, tested, and documented applications and integrations across concurrent projects.
- Provided troubleshooting, application support, enhancements, and knowledge transfer.

Route Miner - Application Developer | Jun 2016 - Nov 2017 | Costa Rica

- Built mobile and backend functionality with unit and UI testing; troubleshoot issues and improved performance.

AI-ASSISTED SOFTWARE ENGINEERING

- Use Claude, OpenCode, and Codex for code generation, refactoring, review, debugging, documentation, and testing.
- Design and use AI agents, reusable skills, and MCP integrations to support structured development workflows.

OPEN SOURCE & ENGINEERING LEADERSHIP

EndToEndLabCR - Open Source Software Engineering Community | GitHub: github.com/EndToEndLabCR

- Lead an open-source software engineering community focused on practical development, collaboration, and knowledge sharing.
- Establish reusable project templates, documentation structures, and engineering workflows.

Alonsovndev - Open Source Software Engineering Projects | GitHub: github.com/alonsovndev

- Build open-source developer-productivity tools and applications using React, TypeScript, Python, FastAPI, PostgreSQL, and Docker.
- Apply Clean Architecture, Domain-Driven Design, API-first design, automated testing, and CI/CD.
